SRI SARADA COLLEGE FOR WOMEN (AUTONOMOUS), SALEM - 16. Reaccredited with B++ Grade by NAAC

(Affiliated to Periyar University)

PG & RESEARCH DEPARTMENT OF COMPUTER SCIENCE

OUTCOME BASED SYLLABUS

B.Sc. Computer Science

(For the students admitted in 2025 - 26)

(I Semester, II Semester, IV Semester & V Semester)

Programme Outcomes:

- **PO1** To apply knowledge of computing appropriate to the discipline
- **PO2** To identify, formulate, and develop solutions to computational challenges based on ethical principles.
- **PO3** To design, implement, and evaluate a computational system to meet desired needs within realistic constraints.
- **PO4** To equip students with sufficient knowledge in web-based programming languages for research project management.
- **PO5** To use appropriate techniques, skills and tools necessary for sustainable development of societal and environmental contexts.
- **PO6** To apply programming skills with their enhanced creativity as an individual or team.

Programme Specific Outcomes

- PSO1: Think in a critical and logical based manner
- PSO2: Familiarize the students with suitable software tools of computer science and industrial applications to handle issues and solve problems in mathematics or statistics and real time application related sciences.
- PSO3: Know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.
- PSO4: Understand, formulate, develop programming model with logical approaches to Address issues arising in social science, business and other contexts.
- PSO5: Acquire good knowledge and understanding to solve specific theoretical and applied problems in advanced areas of Computer science and Industrial statistics.
- PSO6: Provide students/learners sufficient knowledge and skills enabling them to undertake further studies in Computer Science or Applications or Information Technology and its allied areas on multiple disciplines linked with Computer Science

SRI SARADA COLLEGE FOR WOMEN (AUTONOMOUS), SALEM - 16.

PG & RESEARCH DEPARTMENT OF COMPUTER SCIENCE

B.Sc. Computer Science

PROGRAMME STRUCTURE UNDER CBCS

(For the students admitted in 2025-26)

Total Credits: 140 + 1 + Extra Credits (Maximum 28)

I SEMESTER

| Part | Course | Course Title | Code | Hrs./ | Credits | | | | |
|------|---|--|-------------------------------|----------|------------|--|--|--|--|
| I | Language | Tamil - I Hindi - I Sanskrit - I | 25ULTC1 25ULHC1 25ULSC1 | Week 6 | 3 | | | | |

| UNIT | C | ontents | 6 | | | | | | | No. of Hours |
| I Basics of Python Programming: History of Python-Features of Python-Literal-Constants Variables - Identifiers—Keywords-Built-in Data Types-Output Statements - Input Statements-Comments - Indentation- Operators-Expressions-Type conversions. Python Arrays: Defining and Processing Arrays – Array methods. | | | | | | 15 | | | | |
| II | Control Statements: Selection/Conditional Branching statements: if, ifelse, nested if and if-elif-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. Jump Statements: break, continue and pass statements. | | | | | | 15 | | | |
| III | Functions: Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. Function Arguments: Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments- Recursion. Python Strings: String operations-Immutable Strings - Built-in String Methods and Functions - String Comparison. Modules: import statement- The Python module – dir() | | | | | 15 | | | | |
| IV | function – Modules and Namespace – Defining our own modules. Lists: Creating a list -Access values in List-Updating values in Lists-Nested lists -Basic list operations-List Methods. Tuples: Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples—Difference between lists and tuples. Dictionaries: Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods - Difference between Lists and Dictionaries. | | | | | | 15 | | | |
| V | Python File Handling: Types of files in Python - Opening and Closing files-Reading and Writing files: write() and writelines() methods-append() method - read() and readlines() methods - with keyword - Splitting words - File methods - File Positions- Renaming and deleting files. | | | | | | 15 | | | |

| | | equations | S. | | | | | | | |

Course Outcomes:

Students will be able to

CO1:Know how to solve various problems on numerical methods

CO2: Use approximation to solve problems

CO3: Differentiation and integration concept are applied

CO4: Apply, direct methods for solving linear systems

CO5: Find numerical solution of ordinary differential equations

Course Outline

Unit-I(Hours: 15)

Fundamentals of Algebraic Equation

Solution of algebraic and transcendental equations-Bisection method – Fixed point iteration method – Newton Raphson method –linear system of equations – Gauss elimination method – Gauss Jordan method.

Chapter 3 (Sections 3.1, 3.2 & 3.4) & Chapter 4 (Sections 4.2 & 4.2.1)

Unit –II(Hours: 15)

Iterative, Interpolation and Approximation

Iterative methods - Gauss Jacobi and Gauss Seidel — Eigen values of a matrix by Power method and Jacobi's method for symmetric matrices. Interpolation with unequal intervals — Lagrange's interpolation — Newton's divided difference interpolation.

Chapter 4 (Sections 4.7 - 4.9), Chapter 13 (Section 13.1,13.2) & Chapter 8 (Sections 8.1-8.4, 8.5, 8.7)

Unit-III(Hours: 15)

Interpolation with Equal Interval

Difference operators and relations. -Interpolation with equal intervals – Newton's forward and backward difference formulae.

Chapter 5 (Section 5.1, 5.2) & Chapter 6 (Sections 6.1 - 6.3)

Unit-IV(Hours: 15)

Numerical Differentiation and Integration

Approximation of derivatives using interpolation polynomials – Numerical integration using Trapezoidal, Simpson's 1/3 rule.

Chapter 9 (Sections 9.1- 9.4, 9.9 - 9.11 & 9.13)

Unit –V (Hours:15)

Initial Value Problems for Ordinary Differential Equations Single step methods – Taylor's series method – Euler's method – Modified Euler's method – Runge Kutta method for solving(first, second, Third and 4th) order equations – Multi step methods

Chapter 11 (Sections 11.5, 11.9, 11.11 - 11.13 & 11.16 - 11.18)

| | | | | | | | | | | |] | Hours |
| | Introduction: History, characteristics and limitations of Computer. Hardware/Anatomy of Computer: CPU, Memory, Secondary storage devices, Input Devices and Output devices. Types of Computers: PC, Workstation, Minicomputer, Main frame and Supercomputer. Software: System software and Application software. Programming Languages: Machine language, Assembly language, High-level language, 4 GL and 5GL-Features of good programming language. Translators: Interpreters and Compilers. | | | | | | | es, n, nd ee, | 6 | | | |
| II | operat (PDC) Benefit of flo flowed testing | Data types, Input, Prions and Output. It is and drawbacks of owcharts, when to unarts. Pseudocode: Was a program: Committed Programming. | Different phases in mming: Algorithm algorithm. Flowch use flowcharts, flow riting a pseudocounts. | n Pr m: I arts owel | rogra Featu : Ad nart Co | am ares lvar syn ding | De of ntag nbo | velop good ges and ols ar docum | ment d algo d limit d ty nentir | Cycorithrotation pes on an | le m, ns of nd | 6 |
| III | Selection Structures: Relational and Logical Operators -Selecting from Several Alternatives – Applications of Selection Structures. Repetition Structures: Counter Controlled Loops –Nested Loops – Applications of Repetition Structures. | | | | | | | | 6 | | | |
| IV | Data: Numeric Data and Character Based Data. Arrays: One Dimensional Array - Two Dimensional Arrays – Strings as Arrays of Characters. | | | | | | | | | 6 | | |
| V | Data Flow Diagrams: Definition, DFD symbols and types of DFDs. Program Modules: Subprograms-Value and Reference parameters- Scope of a variable - Functions – Recursion. Files: File Basics-Creating and reading a sequential file- Modifying Sequential Files. | | | | | | | - | 6 | | | |

| | Course Outcomes | Programme Outcomes |
|-----|---|---------------------------------|
| CO | On completion of this course, students will | |
| CO1 | Study the basic knowledge of Computers. Analyze the programming languages. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO2 | Study the data types and arithmetic operations. Know about the algorithms. Develop program using flow chart and pseudocode. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO3 | Determine the various operators. Explain about the structures. Illustrate the concept of Loops | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO4 | Study about Numeric data and character-based data. Analyze about Arrays. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO5 | Explain about DFD Illustrate program modules. Creating and reading Files | PO1, PO2, PO3, PO4, PO5, PO6 |

|---|---------------------------------|--|----------------------------|
| Lecture Hours: (L) per week: 2 | Tutorial Hours : - (T) per week | Lab Practice : - Hours: (P)per week | Total: (L+T+P) per week: 2 |
| Course Category : Skill Enhancement Course - II : NME (IKS) | Year & Semester: | I Year II Semester | Admission Year: 2025-26 |
| Pre-requisite | None | | |

Learning Objectives:

- To introduce students to the fundamental concepts and significance of computer science.
- To develop students' algorithmic thinking and problem-solving skills.
- To introduce students to the Indian Knowledge System and its relevance to computer science.
- To instill ethical considerations in computer science and emphasize the importance of responsible technology development.

Unit - I: Indian Contributions to Algorithmic Thinking

Exploration of ancient Indian mathematical and computational contributions, such as the development of algorithms for numerical calculations found in texts like the Sulba Sutras.- Relationship of early algorithms to modern algorithmic thinking in computer science.

Unit - II: Indian Philosophy and Ethics in Computing

Focus on Indian philosophical traditions, like Dharma and Karma - Application of ethical considerations in computer science - philosophies - responsibility and ethical decision-making in technology development.

Unit - III: Sanskrit and Natural Language Processing

Structured nature of the Sanskrit language and its relevance to natural language processing in computer science - Influence of Sanskrit grammar and linguistics in the development of language processing algorithms.

Unit - IV: Ancient Indian Architecture and Computer Systems Design

The relationship of architectural principles found in ancient Indian temple design to modern computer systems design - concepts of symmetry, modularity, and scalability.

Unit - V: Indian Traditional Knowledge and Sustainability in Computing

Relationship between traditional Indian knowledge to sustainable living and ecology, and application of eco-friendly technology and sustainable computing practices.

| Enhancement Course - III | | 2025-26 | |
| Pre-requisite | Basic Computer Kn | owledge | |

Learning Objectives:

- 1. Deliver the fundamental understanding of Cyber Security.
- 2. Familiarize basic methods in Cyber Security
- 3. Explain various Cyber Security applications in society
- 4. Identify the key issues in online modes and safety methods used.
- 1. Checklist for reporting cyber crime at Cyber crime Police Station.
- 2. Checklist for reporting cyber crime online. 3. Reporting phishing emails.
- 3. Demonstration of email phishing attack and preventive measures.
- 4. Basic checklist, privacy and security settings for popular Social media platforms.
- 5. Reporting and redressal mechanism for violations and misuse of Social media platforms.
- 6. Configuring security settings in Mobile Wallets and UPIs. 8. Checklist for secure net banking.
- 7. Setting, configuring and managing three password policy in the computer (BIOS, Administrator and Standard User).
- 8. Setting and configuring two factor authentication in the Mobile phone.
- 9. Security patch management and updates in Computer and Mobiles.
- 10. Managing Application permissions in Mobile phone.
- 11. Installation and configuration of computer Anti-virus.
- 12. Installation and configuration of Computer Host Firewall. 15. Wi-Fi security management in computer and mobile

List of Practicals

- 1. Introduction to HTML Tags and Page Structure
- 2. Working with Text, Paragraphs, and Line Breaks
- 3. Create Paragraphs and Line Breaks
- 4. Emphasizing Text, Headings, and Horizontal Rules
- 5. Lists and Font Styling
- 6. Text Alignment and Links
- 7. Creating Tables and Frames
- 8. Resize and Align Images
- 9. Adding Multimedia
- 10. HTML Forms for Data Collection
- 11. Create a Simple XML Document
- 12. Adding CSS to the webpages.
- 13. Combining CSS with XML
- 14. Accessing HTML & CSS through the DOM
- 15. Dynamic Content, Styles, and Positioning
- 16. Data Binding
- 17. Simple Java Script Programs
- 18. JavaScript Variables, Functions, Conditions, Loops, and Repetition
- 19. Forms and Validations
- 20. Create a JavaScript program that uses a loop to repeat actions

Strong-3 Medium-2 Low-1

Programme Title : B. Sc. Computer Science

Course Title : Environmental Studies

Course Code : 25UEVSC Hours/Week : 1

Semester : III & IV Credits: 2

Course Objectives

• To educate the students regarding the environmental issues and problems.

- To give an exposure towards the scientific and socio economic dimensions of the environment.
- To impart and enhance the basic knowledge about environment and develop concern towards it.
- To develop the ability to evaluate the measures for the improvement and protection of environment.
- To sensitize the students on the various environmental issues.
- To integrate different disciplines and fields that intersect with environmental concerns
- To make the younger generations aware of the values of natural resources.

Course Outcomes

- Demonstrate critical thinking skills in relation to environmental issues.
- Develop an integrative approach to environmental issues with a focus on sustainability.
- Bring an awareness, knowledge and appreciation of intrinsic values of ecological processes and communities.
- Reflect critically about their roles and identities as citizens, consumers and an environmentalist in the complex, interconnected world.
- Apply systems, concepts and methodologies to analyse and understand interactions between social and environmental processes.
- Understand the transactional character of environmental problems and ways of addressing them, including interactions across local to global scales.

UNIT I - FUNADAMENTALS

Environment-Definition: Scope, Structure and Function of Ecosystems- Producers. Consumers and Decomposers-Energy flow in the Ecosystem-Ecological Succession - Food Chain, Food Webs and Ecological Pyramids - Concept of Sustainable Development.

UNIT II - NATURAL RESOURCES

Renewable Resources-Air, Water, Soil, Land and Wildlife resources; Non-Renewable Resources-Minerals, Coal, Oil and Natural Gas; Environmental problems related to the Extraction and use of Natural Resources.

UNIT III- BIODIVERSITY

Biodiversity – Definition – values-consumption use, Productive social, Ethical, Aesthetic and option Values Threats to Biodiversity-Hotspots of Biodiversity-conservation of Biodiversity: In-situ, Ex-situ, Bio-Wealth National and Global Level.

UNIT IV- ENVIRONMENTAL POLLUTION

Definition - Causes, Effects and Mitigation Measures - Air, Water and Soil Pollution. Noise Pollution, Thermal pollution, Nuclear Hazards, Solid Wastes, Acid Rain, Climate Change and Global Warming, Environmental Laws and Regulations in India-Earth Summit.

UNIT V - POLLUTION AND ENVIRONMENT

Population Explosion - Environment and Human Health - HIV/AIDS- Women and Child Welfare- Resettlement and rehabilitation of people, Role of Information Technology in Environmental Health. Environmental Awareness. Environmental Disaster Management - Fire Safety and Prevention.

Field work

- Visit to area to document environmental assets: river/forest/flora/fauna, etc.,
- Visit to a local polluted site-Urban/Rural/Industrial/Agricultural.
- Study of common plants, insects, birds and basic principles of identification.
- Study of simple ecosystem-pond, river, Delhi ridge, etc., (Equal to 5 lectures)

LAB EXERCISES

- 1. Create Student mark table and write the conditional expression and logical operators to find the total, average marks and find result.
- 2. Create a bar chart for the product sales data.
- 3. Apply VLOOKUP to find the price of a product based on its product code
- 4. Set a data validation rule to allow only prices between 100 and 2000.
- 5. Sort the data first by Score in descending order, then by Age in ascending order.
- 6. Set a dropdown list of products (Laptop, Phone, Tablet) for column A.
- 7. Create a PivotTable to summarize total sales by region.
- 8. Calculate the current age of each person based on their birthdate.
- 9. If you want to increase the price of a product so the total sales reach \$1500, What should be the new price for the "Phone" (with 2 units sold)?

| A | В |
|---------|------|
| Product | 1200 |
| Laptop | 800 |
| Phone | 600 |
| Tablet | 600 |

10. Create a bar chart for the product sales data.

| LO5 | То д | get a knowledge on OOPS | with PHP. | | | | | | | | | |

- 1. Create a PHP file that declares a set of variables for your dynamic website and outputs them in different HTML tags.
- 2. Create a PHP file that checks a user's age and returns whether they are a child, teenager, or adult.
- 3. Create a switch statement that checks the day of the week and displays an appropriate message.
- 4. Create a PHP script that prints numbers from 1 to 10 using a while loop.
- 5. Modify the previous script to print numbers from 1 to 10 using a for loop.
- 6. Create an array of fruits and modify one of the elements.
- 7. Create a function in PHP to calculate the sum of an array of numbers. Use this function to display the sum of an array that contains five user-defined numbers.
- 8. Create a form that lets users select their favorite fruits, then use PHP to store the form selection in an array and display the selected items.
- 9. Create a PHP script that writes some text into a file and reads it back.
- 10. Create PHP script for managing Sessions and Cookies
- 11. Create a PHP script that starts a session, stores the user's name, and displays it on subsequent visits. Also, provide an option to destroy the session and log out the user.
- 12. Create a PHP script that sets a cookie for the user's favorite color, and another script that reads and displays that cookie.

| | Course Outcomes | Programme Outcomes |
|-----|--|--------------------|
| CO | On completion of this course, students will | |
| CO1 | Write PHP scripts to handle HTML forms | PO1,PO4,PO6 |
| CO2 | Write regular expressions including modifiers, operators, and meta characters. | PO2,PO5 |
| CO3 | Create PHP Program using the concept of array. | PO3,PO4,PO5. |
| | Create PHP programs that use various PHP library | PO2,PO3,PO5 |
| CO4 | functions | |
| CO5 | Manipulate files and directories. | PO3,PO5,PO6. |

S-Strong-3 M-Medium-2 L-Low-1

QUESTION PAPER PATTERN

Time: 3 Hours

Maximum Marks: 70

Section – A $(20 \times 1 = 20 \text{ Marks})$

Answer all questions Choose the Correct Answer

Section – B (5 x 4 = 20 Marks)

Answer all questions.

| 21. a) | (or) | b) | from Unit I |
|--------|------|----|---------------|
| 22. a) | (or) | b) | from Unit II |
| 23. a) | (or) | b) | from Unit III |
| 24. a) | (or) | b) | from Unit IV |
| 25. a) | (or) | b) | from Unit V |

Section – C $(3 \times 10 = 30 \text{ Marks})$

Answer any Three questions.

- 26. Question from Unit I
- 27. Question from Unit II
- 28. Question from Unit III
- 29. Question from Unit IV
- 30. Question from Unit V
