SRI SARADA COLLEGE FOR WOMEN (AUTONOMOUS)

SALEM – 16
Reaccredited with 'B++' Grade by NAAC
(Affiliated to Periyar University)

DEPARTMENT OF STATISTICS

OUTCOME BASED SYLLABUS
B.Sc. Statistics
(From the academic year 2024 – 25 onwards)

SRI SARADA COLLEGE FOR WOMEN (AUTONOMOUS), SALEM – 16.
DEPARTMENT OF STATISTICS
B.Sc. STATISTICS
PROGRAMME STRUCTURE UNDER CBCS
(From the academic year 2024-25 onwards)
Total Credits: 140 + Extra Credits (Maximum 28)

I - SEMESTER

Part	Course	Course Title	Code	Hours per week	Credit
I	**Language**	Tamil/Hindi/Sanskrit	24ULTC1/ 24ULHC1/ 24ULSC1	6	3
II	**English**	General English – I	24ULEC1	6	3
III	**Core Course – I**	Descriptive Statistics	24USTCC1	5	5
	Core Course – II	Probability Theory	24USTCC2	5	5
	Elective – I Generic Course	Algebra and Differential Calculus	24USTGEC1	4	3
IV	**Skill Enhancement Course (NME 1)**	Basics` of Statistics	24USTSEC1	2	2
	Skill Enhancement (Foundation Course)	Introductory Statistics	24USTSECFC	2	2
				30	**23**
V *(Extra Skills)*	• *Articulation and Idea Fixation Skills* • *Physical Fitness Practice – 35 hours per semester* *Advanced Diploma Course in Statistical Methods Level – I: Certificate Course 100 hours per Year*				

II - SEMESTER

Part	Course	Course Title	Code	Hours per week	Credit
I	**Language**	Tamil/Hindi/Sanskrit	24ULTC2/ 24ULHC2/ 24ULSC2	6	3
II	**English**	General English – II	24ULEC2	6	3
III	**Core Course – III**	Matrix and Linear Algebra	24USTCC3	5	4
	Core Course – IV	Distribution Theory	24USTCC4	4	4
	Generic Course Allied – II	Integral Calculus and Laplace Transforms	24USTMGEC2	3	3
		Theory of Equations and Laplace Transforms using Sagemath Practical	24USTMGECQ	2	2
IV	**Skill Enhancement Course (NME I1)**	Statistics in Ancient India	24USTSEC2	2	2
	Skill Enhancement (SEC III)	Basic Statistics: Practical - I (Problems from CORE COURSE I, II, III and IV)	24USTSECQ3	2	2
				30	**23**
	• *Articulation and Idea Fixation Skills* • *Physical Fitness Practice – 35 hours per semester*				
	• *Advanced Diploma Course in Statistical Methods Level – I: Certificate Course 100 hours per week*				

B.Sc. Statistics : Programme Outcome, Programme Specific Outcome and Course Outcome

Statistics is the study of Data and extracting knowledge in the data using various methods and techniques, analyze and interpret data, taking data driven predictions and decisions. It also helps data collection through sampling techniques, that is to collect data focusing on problem solving, and presenting it with wider scope of application in science, social sciences, medical science, life sciences, country's official statistics etc. Statistical methods are used as research methodology in all most all domains. The key core areas of study in Statistics include Descriptive Statistics, Probability Theory, Sampling techniques, Matrix and Linear Algebra, Distribution Theory, Estimation Theory, Testing of Statistical hypotheses, Stochastic process, Regression analysis, Design of Experiments, Demography and Official Statistics. The Bachelor's Degree B.Sc. Statistics is awarded to the students on the basis of knowledge, understanding, skills, attitudes, values and academic achievements expected to be acquired by learners at the end of the Programme. Learning outcomes of Statistics are aimed at facilitating the learners to acquire these attributes, keeping in view of their preferences and aspirations for gaining knowledge of Statistics.

Bachelor's degree in Statistics is the culmination of in-depth knowledge in both theoretical and practical methods and techniques of Statistics. This also leads to study of related areas like Computer science, Industrial Statistics, Mathematical Statistics, Business Statistics and many more. Thus, this programme helps learners in building a solid foundation for higher studies in Statistics. The skills and knowledge gained have intrinsic aesthetics leading to proficiency in analytical reasoning. This can be utilized in Statistical modelling and solving real life problems.

Students completing this programme will be able to present Statistics clearly and precisely, make abstract ideas precise by formulating them in the language of Statistics, describe Statistical ideas from multiple perspectives and explain fundamental concepts of Statistics to those non-Statistics users.

Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in banking, insurance and investment sectors, data analyst jobs, entrepreneurship, business and research areas and jobs in various other public and private enterprises.

Programme outcomes (PO) of B. Sc degree programme in Statistics

- ➢ Scientific aptitude will be developed in Students
- ➢ Students will acquire basic Practical skills & Technical knowledge along with domain knowledge of different subjects in the science & humanities stream.
- ➢ Students will become employable; Students will be eligible for career opportunities in education field, Industry, or will be able to opt for entrepreneurship
- ➢ Students will possess basic subject knowledge required for higher studies,professional and applied courses
- ➢ Students will be aware of and able to develop solution-oriented approach towards various Social and Environmental issues.
- ➢ Ability to acquire in-depth knowledge of several branches of Statistics and aligned areas. This Programme helps learners in building a solid foundation for higher studies in Statistics
- ➢ The skills and knowledge gained leads to proficiency in analytical reasoning, which can be utilized in modelling and solving real life problems.
- ➢ Utilize Statistics to solve theoretical and applied problems by critical understanding, analysis and synthesis.
- ➢ To recognize patterns and to identify essential and relevant aspects of problems.
- ➢ Ability to share ideas and insights while seeking and benefitting from knowledge and insight of others.
- ➢ Develop students into responsible citizens in a rapidly changing interdependent society.

Programme Specific Outcomes (PSO) of B. Sc Degree programme in Statistics

1. **Think in a critical manner**
2. **Familiarize the students with suitable tools of statistical analysis to handle issues and problems in Statistics and related sciences.**
3. **Know when there is a need for information, to be able to identify, locate, evaluate, and effectively use that information for the issue or problem at hand.**
4. **Understand, formulate, develop arguments logically and use quantitative models to address issues arising in social science, business and other contexts.**
5. **Acquire good knowledge and understanding to solve specific theoretical and applied problems in advanced areas of Statistics.**
6. **Provide students/learners sufficient knowledge and skills enabling them to undertake further studies in Statistics and its allied areas on multiple disciplines linked with Statistics.**
7. **Equip with Statistical modelling ability, problem solving skills, creative talent and powerof communication necessary for various forms of employment**
8. **Develop a range of generic skills helpful in employment, internships& societal activities.**
9. **Get adequate exposure to global and local concerns that provides platform for further exploration into multi-dimensional aspects of Mathematical sciences**

Programme Title	: B.Sc. Statistics		
Course Category	: Core Course – I		
Course Title	: DESCRIPTIVE STATISTICS		
Course Code	: 24USTCC1		
Hours/Week	: 5 hrs	**Semester**	:I
Credit	: 5	**Batch**	: 2024-2027

Objectives of the Course

1. It explains the important concepts of statistics and statistical data.
2. It provides to formulate the visualization of frequency distribution.
3. Also they measure the averages, dispersions, lack of symmetry, moments, relationship among variables.
4. Estimate and predict the unknown and future values.
5. Study of non-linear and consistency of the data.

Unit – I (Hours: 12)

Statistics: Introduction - Definition – Functions - Applications - Limitations. Organising a Statistical Survey: Planning the survey - Executing the survey-Collection of Data: Primary and secondary data - Methods of collecting primary data - Sources of secondary data. Sampling: Census and Sample methods. Classification-Types - Formation of frequency distribution-Tabulation - parts of a Table - Types. Diagrammatic representation – Types. Graphical representation - Graphs of frequency distributions. Merits and Limitations of diagrams and graphs.

Unit-II (Hours: 12)

Measures of Central tendency: Introduction-Definitions-Types - Mean-Median-Mode-Geometric mean-Harmonic Mean-Weighted mean - Merits and Demerits-Measures of Dispersion: Introduction – Definition – Types – Range - Quartile deviation - Mean deviation - Standard deviation - Co-efficient of variation – Lorenz curve - Merits and Demerits.

Unit-III (Hours: 12)

Skewness: Introduction-Definition-Types-Karl Pearson's – Bowley's - Kelly's methods – Their merits and demerits. Kurtosis: Introduction-Definition-Types-Its merits and demerits. Moments: Introduction - Definition-Types - Raw, Central moments and their relations.

Unit-IV (Hours: 12)

Correlation analysis: Introduction - Definition - Types – Ungrouped and Grouped data – Probable error – properties - Rank correlation – Partial and Multiple correlations - Regression analysis: Introduction - Definition – Regression Equations -Multiple regression - Principle of least squares for first degree, Second degree, Exponential and Power curves.

Unit-V(Hours: 12)

Theory of Attributes: Introduction – Definition-Classes and Class frequencies-Consistency of data-Independence of attributes-Association of attributes-Yule's coefficient and -Coefficient of Colligation.

Website and e-Learning Source	e-books, tutorials on MOOC/SWAYAM courses on the subject https://en.wikipedia.org/wiki/Statistics https://en.wikipedia.org/wiki/Descriptive_statistics https://socialresearchmethods.net/kb/statdesc.php http://onlinestatbook.com/2/introduction/descriptive.html
Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, ProfessionalCompetency, Professional Communication and Transferrable Skill

Course Outcomes (CO):

Students will be able to

CO-1: Describe the scope, functions, applications and limitations of Statistics.

CO-2: Also to explain the statistical survey, collection of data, sampling and presentation of data.

CO-3: Discuss the importance and uses of central values and dispersions for the various types ofdata.

CO-4: Also to measure the various measures of averages and scatteredness of the mass of data ina series.

CO-5: Explain about the lack of symmetry, r^{th} moments and peakedness of the frequency distributions.

CO-6: Ability to apply in data

Mapping of Cos with PSOs

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8	PSO9
CO1	S	S	M	M	M	S	M	S	M
CO2	S	S	S	S	M	S	M	S	M
CO3	S	S	S	M	S	S	M	S	S
CO4	M	S	S	S	S	S	S	S	M
CO5	S	S	S	S	M	S	S	S	M
CO6	S	S	S	S	M	S	S	S	M

Programme Title	: B.Sc. Statistics		
Course Category	: Core Course – II		
Course Title	: PROBABILITY THEORY		
Course Code	: 24USTCC2		
Hours/Week	: 4 hrs	Semester	I
Credit	: 5	Batch	: 2024-2027

Objectives of the Course

1. It provides the study of random variable, distribution function, mathematical expectation,
2. Generating function and law of large numbers.
3. Two-dimentional variables and its distributions

Unit-I (Hours: 12)

Theory of Probability: Introduction-Basic terminology- Definition - Axiomatic approach – Types of Events - Conditional Probability - Addition and Multiplication theorems of Probability for 'two' and 'n' events (Statement and Proof) - Boole's inequality (Statement and Proof)- Bayes' theorem of Probability (Statement and Proof with numerical illustration -very simple problems)

Unit-II(Hours: 12)

Random variables and Distribution functions: Introduction - Discrete random variable: Probability mass function- Discrete distribution function, Properties. Continuous random variable : Probability density function and properties, measures of central tendency, dispersion, Skewness and kurtosis for continuous Probability distribution.

Unit-III(Hours: 12)

Two dimensional random variables - Joint probability mass function- Marginal probability function, Conditional probability function. Two dimensional distribution functions-Marginal distribution functions - Joint density function-Marginal density function - Conditional distribution function - Conditional probability density function. Transformation of One - Dimensional and Two Dimensional random variable (concept only).

Unit-IV(Hours: 12)

Mathematical Expectations: Introduction- Expected value of a random variable (Discrete and Continuous)-Expected value of function of a random variable - Properties of Expectation- Properties of variance- Covariance. Inequalities involving expectation: Cauchy Schwartz and Markov inequalities.

Unit-V(Hours: 12)

Generating functions: M.G.F-Properties-Uniqueness theorem - C.G.F-Properties- P.G.F-Properties. Characteristic Function: Properties–Inversion theorems (Statement only)- Uniqueness theorem (Statement only). Chebychev's Inequality (Statement and Proof). Law of Large Numbers (L.L.N): Convergence in probability - Properties: Weak L.L.N - properties-Bernoulli's L.L.N (Statement and Proof) - Khinchin's theorems (Statement only).

Recommended Texts	1.Gupta S.C. and Kapoor V.K (2015): Fundamentals of Mathematical Statistics, Sultan Chand & Sons.
Reference Books	1.Rohatgi, V.K. (1984): An introduction to probability theory and mathematical statistics. 2.Hogg. R.V. and Craig. A.T. (1978) : Introduction to Mathematical Statistics, McGraw Hill Publishing Co. Inc. New York. 3.Mood A.M. Graybill, F.A. and Bose. D.C. (1974): Introduction to the theory of Statistics, McGraw Hill Publishing Co. Inc. New York. 4.Sanjay Arora and Bansilal (1989): New Mathematical Statistics, Satyaprakashan, New Delhi.
Website and e-Learning Source	e-books, tutorials on MOOC/SWAYAM courses on the subject www.khanacademy.org/math/statistics-probability/random-variables-stats-library https://ocw.mit.edu/courses/mathematics/18-440-probability-and-random-variables-spring-2014/
Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Course Outcomes (CO):

Students will be able to

CO1: Understand concepts of probability and Identify the different approaches of probability theory

CO2: Define the random variable and its respective probability values and to compare a discrete and continuous random variable.

CO3: Calculate the expected value of a random variable variance, covariance, moments and find the conditional expectation and variance of bi-variate random variable.

CO4: Estimate the measures of central values, Dispersions, Skewness and Kurtosis through th generating function

CO5: Understand bivariate random variables and its distributions

CO6: Application of probability theory in real life

Programme Title   : B.Sc. Statistics
Course Category   : Generic Course
Course Title   : ALGEBRA AND DIFFERENTIAL CALCULUS
Course Code   : 24USTMGEC1

		Semester	I
Credit	: 3	Batch	: 2024-2027

Objectives of the Course:
1. To create deep interest in learning Mathematics which develop broad and balance knowledge and understanding definitions, concepts, principles and theorems.
2. It helps the students to enhance the ability of learners to apply the knowledge and skill acquired by them to solve specific theoretical and applied problems in Mathematics.
3. It also encourages the students to develop a range of generic skill helpful in employment, internships in social activities.

Unit - I (Hours:12)
Matrices
Rank of a matrix, Elementary transformations, Equivalent matrices, Finding the rank of a matrix using elementary transformations (Upto third order) Characteristic equation of a matrix, characteristic vectors of a matrix, Cayley – Hamilton theorem (statement only), Verification of Cayley –Hamilton theorem. (**Examples 3-16 to be excluded)**
Chapter – 5 (Page No: 5.25 – 5.37, 5.50-5.54,5.61-5.75)

Unit - II (Hours:12)
Theory of Equations
Relation between the roots and coefficients of an equation, Imaginary and irrational roots, Symmetric functions of the roots of an equation in terms of its coefficients (up to cubic equations) and Reciprocal equation.
Chapter 6 (Page No: 6.2 – 6.37)

Unit - III(Hours:12)
Theory of Equations
Transformation of equation (Definition only), Multiplication of roots by m(Definition only), Diminishing the roots of an equation, Removal of a term, Descartes' rule of sign, Descartes rule of signs for negative roots of an equation, Horner's method, Newton's method of evaluating a real root correct to given decimal places.
Chapter 6 (Page No: 6.38 - 6.67)

Unit - IV(Hours:12)
Rational fractions
Rational fractions – Proper and improper rational fractions, Partial fractions forms of Partial fractions.
Chapter 1 (Page No: 1.1 – 1.14)

Unit - V(Hours:12)
Differential calculus
Successive differentiation: Leibnitz's theorem, nth derivatives of standard functions – simple problems. Partial differentiation – Maxima and minima for two variable functions homogeneous function- Euler's theorem on homogeneous function.
Chapter 8 and 9 (Page No: 8.1 – 8.42, 9.1 – 9.62)

Skills acquired from the course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Text Reference Books	P.R. Vittal - Allied Mathematics**,** Margham Publications,Chennai-17 (i) Durai Pandian P and Udaya Baskaran S (2014) : Allied Mathematics, Vol – I & II , S. Chand & Company Pvt. Ltd. (ii) T.K. Manicavachagam Pillai, T. Natarajan& K.S. Ganapathy - Algebra Volume-I, S. Viswanathan Publishers, Pvt. Ltd, 2004.

Course Outcomes:

Students will be able to

CO1: Learn the concepts of matrices, Rank of the matrix characteristic roots.

CO2: Solve the problems about polynomials with real coefficients, imaginary and irrational roots.

CO3: Analysis various methods to find roots of polynomial equation and inspect Horner's method and Newton's method to find approximate real roots

CO4: Distinguish between proper and improper fractions. Express an algebraic fraction as a sum of its partial fractions.

CO5: Obtain the nth derivative in successive differentiation. Apply Euler's theorem on Homogeneous function.

Mapping of COs with PSOs

Programme Title	: B.A/B.SC/B.Com		
Course Category	: Skill Enhancement Course (NME – I)		
Course Title	:: BASICS OF STATISTICS		
Course Code	: 24USTSEC1		
Hours/Week	: 2 hrs	Semester	I
Credit	: 2	Batch	: 2024-2027

Objectives of the Course:

1. To introduce the basic concepts of Statistics
2. To make them to apply real time data
3. To learn statistical techniques for data analysis

Note: Derivations are not included Questions – Only on the topics mentioned.

Unit – I   **No of hours: 6 hrs**
Introduction to Statistics, Functions and Applications of Statistics.
Volume 1 – Chapter 1 (Page No. 1-18)

Unit – II   **No of hours: 6 hrs**
Types of data, Collection of data, Presentation of data, Tabulation and Classification of data
 Volume 1 – Chapter 3 (Page No. 39-44), Volume 1 – Chapter 5 (Page No. 91-95)

Unit – III   **No of hours: 6 hrs**
Diagrammatic and Graphical Representation of data, Types of Diagrams
Volume 1 – Chapter 6 (Page No. 130-154)

Unit – IV   **No of hours: 6 hrs**
Measures of Central tendency – Definition and its characteristics – Mean, Median, Mode-(Individual and Discrete series only) Simple problems.
Volume 1 – Chapter 7 (Page No. 180-213)

Unit – V   **No of hours: 6 hrs**
Correlation – Definition, its types and uses co-efficient of correlation for ungrouped data only – Rank correlation co-efficient (No repeated ranks) – Simple problems
Volume 1 – Chapter 10 (Page No. 378-381), Volume 1 – Chapter 10 (Page No. 386-388, 406-407)

BOOKS FOR STUDY

S.P. Gupta : Statistical Methods 37th Edition, Sultan Chand & Sons Publications.

BOOKS FOR REFERENCE
1.B.L.Agarwal : Programmed Statistics.
2.R.S.N. Pillai and Bagavatti : Statistics.
3.P.R. Vital: Business Statistics.

Course Outcomes (CO)

Students will be able to

1. **apply** various statistical techniques related data

2. **identify** the data and present it precisely

3. **organize** and **summarize** the data using descriptive statistics

4. **predict** the relevant relationship between various variables

Mapping of COs with PSOs:

CO	PSO

CO2	L	L	M		L	M		M	
CO3	M			M	S	M	L	M	L
CO4	L		M	S		M	S	M	S

L – Low; M – Medium; S - Strong

Programme Title   : B.SC Statistics
Course Category   : Foundadtion Course
Course Title   : INTRODUCTORY STATISTICS
Course Code   : 24USTSEFC
Hours/Week   : 2 hrs   **Semester**   I
Credit   : 2   **Batch**   : 2024-2027

 Course Objective:

    1.   To introduce the basic concepts of Statistics
    2.   To make them to apply real time data
    3.   To learn statistical techniques for data analysis

Note: Derivations are not included Questions – Only on the topics mentioned.

Unit – I   **No of hours: 6 hrs**
Introduction to Statistics, Growth of Statistics, Functions and Applications of Statistics, Limitations of Statistics.

Unit – II   **No of hours: 6 hrs**
Types of data, Methods of Collecting data, Presentation of data, Meaning and objectives of Classification, Tabulation of data

Unit – III   **No of hours: 6 hrs**
Diagrammatic and Graphical Representation of data, Types of Diagrams

Unit – IV   **No of hours: 6 hrs**
Measures of Central tendency – Definition and its characteristics – Mean, Median, Mode-(Individual and Discrete series only) Simple problems.

Unit – V   **No of hours: 6 hrs**
Correlation – Definition, its types and uses co-efficient of correlation for ungrouped data only – Rank correlation co-efficient (No repeated ranks) – Simple problems

BOOKS FOR STUDY

1.S.P. Gupta : Statistical Methods 37th Edition, Sultan Chand & Sons Publications

BOOKS FOR REFERENCE
    1. **NCERT class XI and XII text books.**
    2. **Any State board Statistics text books of class XI and XII**

Course Outcomes (CO) :

Students will be able to

1. **apply** various statistical techniques related data

2. **identify** the data and present it precisely

3. **organize** and **summarize** the data using descriptive statistics

4. **predict** the relevant relationship between various variables

Programme Title	: B.Sc. Statistics		
Course Category	: **Core** Course – III		
Course Title	: **Matrix and Linear Algebra**		
Course Code	: **24USTCC3**		
Hours/Week	: **5 hrs**	**Semester**	: **II**
Credit	: **4**	**Batch**	: **2024-2027**

Objectives of the Course

1. *To study the basic operations of transpose and inverse of matrices*
2. *To know the structure of orthogonal and unitary matrices*
3. *To learn the invariance properties of ranks*
4. *To know and to apply the concepts of vector space and matrix polynomials.*

Unit I   Matrices-Transpose-Conjugate transpose- Reversal law for the transpose and conjugate transpose. Adjoint of a matrix, Inverse of a matrix, Singular and Non -Singular matrices,

Unit II   Reversal law for the inverse of product of two matrices. Commutativity of inverse and transpose of matrix, Commutativity of inverse and conjugate transpose of matrix, Orthogonal and Unitary Matrices, Product of unitary matrices, Partitioning of matrices.

Unit III   Rank of a matrix, Echelon form, Rank of transpose, Elementary transformations, Elementary matrices, Invariance of rank through elementary transformations, Reduction to Normal form, Equivalent matrices.

Unit-IV   Vector space – Linear Dependence - Basis of a vector space –Sub-space - Properties of Linearly Independent and Dependent systems, Row and Column spaces, Equality of Row and Column ranks, Rank of Sum and Product of matrices

Unit-V Matrix polynomials, Characteristic roots and vectors, Relation between characteristic roots and characteristic vectors, Algebraic and Geometric multiplicity, Nature of characteristic roots in case of special matrices,   Cayley- Hamilton theorem.

Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Weighted percentage of Course Contribution to Pos	3.0	3.0	3.0	3.0	3.0

Level of Correlation between PSO's and CO's

Objectives of the Course

1. To learn discrete distributions
2. To learn continuous distributions
3. To understand Distributions generated from mathematical functions
4. To learn normal distribution and its properties
5. To understand about sampling distributions

Unit I

Binomial distribution – moments, recurrence relation, mean deviation, mode, moment generating function, characteristic function, cumulants. Fitting of Binomial Distribution. Poisson distribution – moments, mode, recurrence relation, moment generating function, characteristic function, cumulants. Fitting of Poisson distribution. Negative binomial distribution – m.g.f., cumulants. Fitting of Negative binomial distribution.

Unit II

Geometric distribution – lack of memory, moments, m.g.f.- Hypergeometric distribution – mean, variance, approximation to Binomial, recurrence relation – Multinomial distribution – m.g.f., mean and variance.

Unit III

Normal Distribution – chief characteristics of the normal distribution and normal probability curve, mean, median, mode, m.g.f. characteristic function, moments, points of inflexion, mean deviation, Area property – Rectangular distribution – moments, m.g.f., characteristic function, mean deviation about mean.

Unit-IV

Exponential distribution – m.g.f., characteristic function, memory less property – Gamma distribution – m.g.f., cumulants and central moments, reproductive property – Beta distribution – First kind and second kind – constants.

Unit-V

Functions of Normal random variables leading to t, Chi-square and F-distributions (derivations, properties and interrelationships).

Course Learning Outcome (for Mapping with POs and PSOs)

Students will be able to
CLO-1 identify discrete distributions appeared in real life situations
CLO-2 understand some continuous distributions and its applications
CLO-3 connection between some of the real values mathematical functions and its application in distribution theory
CLO-4 understand normal distribution and its properties
CLO-5 understand sampling distributions and its applications in real life
CLO-6 identify probability models in real data and estimate population parameters

	PSO1	PSO2	PSO3	PSO4	PSO5	PSO6	PSO7	PSO8	PSO9
CLO1	S	S	M	M	M	S	M	S	M
CLO2	S	S	S	S	M	S	M	S	M
CLO3	S	S	S	M	S	M	M	S	M

Title of the Course	INTEGRAL CALCULUS AND LAPLACE TRANSFORM (I B.Sc STATISTICS)
Paper Number	EC II (GENERIC)

Category ELECTIVE	Year	I	Credits	3	CourseCode	24USTMGEC2
	Semester	II				

Instructional Hours per week	Lecture	Tutorial	Lab Practice	Total
	3	-	-	3

Pre-requisite	12th Standard Mathematics

Objectives of the Course

1.To acquire the knowledge in integral calculus, Fourier series and Laplace transform
2. To understand the method of doing problems using the above concepts.
3. To analysis the different methods of solving differential equations using the Laplace transform

Course Outcomes:
Students will be able to
CO1:learn and understand the methods of double integrals.
CO2:learn and understand the methods of triple integrals.
CO3:apply the concept of integration to evaluate Fourier series.
CO4:evaluate the solutions of differential equations using Laplace transform
CO5:evaluate the solutions of differential equations using inverse Laplace transform
Course Line:

Unit -I (Hours : 9)
Integral calculus
Multiple Integral Evaluation of double integrals, Double integral in polar co-ordinates.
Chapter 20 (section 20.1-20.17)

Unit -II(Hours :9)
Triple integrals, change of order of integration, applications of double and triple integrals to area volume and centroid.
Chapter 20(section 20.18-20.44)

Unit – III (Hours : 9)
Fourier Series
Definition, Finding Fourier series for a given periodic function with period 2π, Fourier series for odd and even functions.
Chapter 21 (sections 21.1-21.40)

Unit – IV(Hours : 9)
Laplace Transform
Definition, Laplace transform of elementary functions, Linearity property, Shifting property, Change of Scale property, Laplace transform of derivatives.
Chapter 27 (sections 27.1-27.20)

Skills acquired from the course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Title of the Course	**THEORY OF EQUATIONS AND LAPLACE TRANSFORM USING SAGE MATH- PRACTICAL (I B.ScSTATISTICS)**					
Paper Number	**EC – PRACTICAL**					
Category **ELECTIVE**	**Year**	**I**	**Credits**		**Course Code**	**24USTMGECQ**
	Semester	**II**				
Instructional Hours per week	**Lecture**	**Tutorial**	**Lab Practice**		**Total**	
	-	-	2		2	
Pre-requisite	Basic knowledge in data and representations					
Objectives of the Course	The main objectives of this course are:					

The main objectives of this course are:
1. To work with interpolation and approximation methods in finding roots using Sage Math.
2. To utilize Sage Math to perform symbolic and numerical integration. and Laplace Transforms

Course outcome

Unit I: Theory of Equations
Problems on Finding the roots of the equations using the SageMath.
(Page No: 140-141)

Unit II: Non-Linear Equations
Numerical Solution: Location of solutions of Algebraic equations and Iterative Approximation Methods using SageMath
(Page No: 263-278)

Unit III: Multiple integral
Available Integration Functions, Multiple Integrals using SageMath

(Page No: 305-317)

Unit IV: Laplace Equations

Solving problems on Laplce transforms using SageMath
(Page No: 225)

Unit V: Inverse Laplace Transforms
Solving problems on Inverse Laplace transformations using SageMath
(Page No: 226)

Skills acquired from the course	Computational Mathematics with SageMath

Web resources

Course Title   : Basic Statistics (Practical – I)
Course Code   : 24USTSECQ3
Hours/Week   : 2 hrs
Semester   : II
Credit   : 2

Course Objective:
   The course aims to provide data handling experience using MS- Excel

Basic Statistics (Practical – I)
(Problems from CORE COURSE I, II, III and IV)

1.   Measures of Central Tendencies
2.   Measures of Dispersion
3.   Correlation and Regression Analysis
4.   Association of Attributes.
5.   Addition Theorem and Booleans Inequalities.
6.   Conditional Probability and Multiplication Theorem.
7.   Bayes Theorem
8.   Matrix Operations
9.   Rank of a Matrix
10.   Characteristic roots.
11.   Fitting of Distribution (Discrete and Continuous Distribution).

Course Title   : NME – II: Statistics in Ancient India.
Course Code   : 24USTSEC2
Hours/Week   : 2 hrs
Semester   : II
Credit   : 2

Course Objective:
   The course aims to provide insight about statistics used in ancient India.

Unit – I: Introduction
Statistics: Definition – Importance and its uses – Probability: Definition and basic terminologies – Addition and Multiplication Theorem

Unit – II: Vedic Mathematics
Introduction - Basic Vedic Mathematical formulae- Sutras for Addition, Subtraction, Multiplication and sub- Multiples – Nikhilam method Yavadunam for finding square and cubic
roots.

Unit – III: Statistics in ancient India
Introduction – Probability concepts in Ancient India – Application of Probability in Dice, Vaccines and insurance in Ancient India.

Unit – IV: Statistics in Games
Introduction – Permutation and Combinatorics - Game of Dice in India – Hymn on Dice in Rigveda – Gambling in Mahabharata.

Unit – V: Evolution of Statistics.
Statistics in ancient Period – Moghul Period – Early and Later British Period – Statistics after Independence
